# End-User Documentation

This documentation is for people who operate Melbourne Guitar School day-to-day.

If you are an admin user, this set teaches you how to: - manage bookings, - manage customers, - create and send invoices, - follow up overdue invoices, - handle common issues safely.

## Who This Is For

- Owner/admin operators.
- Front-desk/operations support.
- Backup team members covering bookings and billing.

## Start Here

1. 01-Getting-Started.md
2. 02-Admin-Login-and-Access.md

3. [03-Booking-Management.md](#)
4. [04-Customer-Directory.md](#)
5. [05-Invoice-Management.md](#)

## Full Guide Index

- [01-Getting-Started.md](#): Platform orientation and first-use path.
- [02-Admin-Login-and-Access.md](#): Admin sign-in, sign-out, and access issue recovery.
- [03-Booking-Management.md](#): Calendar workflows, booking updates, and booking-side invoice start.
- [04-Customer-Directory.md](#): Customer create/edit/search and invoice-history navigation.
- [05-Invoice-Management.md](#): Full invoice lifecycle from create to paid/credit note.
- [06-Email-and-Notifications.md](#): Manual and scheduled communications, plus SMTP fallback behavior.
- [07-Reports-Outstanding-and-Follow-Up.md](#): Outstanding invoice routines and reminder cadence.
- [08-Troubleshooting-and-FAQs.md](#): Fast issue resolution paths for common operations problems.
- [09-Glossary.md](#): Plain-language definitions for operational and billing terminology.

## Recommended Learning Path

### New Admin (First Day)

1. Read [01-Getting-Started.md](#).
2. Log in using [02-Admin-Login-and-Access.md](#).
3. Practice booking actions in [03-Booking-Management.md](#).
4. Practice invoice actions in [05-Invoice-Management.md](#).

### Daily Operator

1. Use [03-Booking-Management.md](#) for calendar and booking tasks.
2. Use [05-Invoice-Management.md](#) for billing tasks.
3. Use [07-Reports-Outstanding-and-Follow-Up.md](#) for reminder cadence.

## Troubleshooting Path

1. Check 08-Troubleshooting-and-FAQs.md first.
2. If issue is billing-related, cross-check 05-Invoice-Management.md.
3. If issue is communication-related, cross-check 06-Email-and-Notifications.md.

## Technical User Section (Owner/Technical Ops)

For technical operators who manage automation and support checks: - Scheduled jobs and override payloads are documented in: - 07-Reports-Outstanding-and-Follow-Up.md (Technical Operations section). - Email delivery fallback behavior (queued\_no\_smtp) is documented in: - 06-Email-and-Notifications.md.

## Screenshot Assets

- Folder: Documentation/assets/
- Capture plan and naming conventions: Documentation/assets/README.md

## Update and Versioning

- Documentation change history: Documentation/CHANGELOG.md
- When product behavior changes, update the affected guide in the same release.

## Documentation Governance

- Owner: Product/Operations lead (or delegated admin owner).
- Review cadence:
  - Monthly quick operational accuracy pass.
  - Release-based review whenever booking, customer, invoice, or email behavior changes.
- Update triggers:
  - UI labels/buttons changed.
  - Workflow steps changed.
  - Environment or policy changed (for example GST process guidance).

# New Admin Onboarding Checklist

1. Read 01-Getting-Started.md and 02-Admin-Login-and-Access.md.
2. Complete one booking workflow using 03-Booking-Management.md.
3. Complete one invoice workflow using 05-Invoice-Management.md.
4. Review follow-up cadence in 07-Reports-Outstanding-and-Follow-Up.md.
5. Review issue recovery in 08-Troubleshooting-and-FAQs.md.

## Operations Checklist

### Daily

1. Review bookings calendar for pending requests and time changes.
2. Review outstanding invoices and send overdue reminders as needed.
3. Confirm key communication actions were sent (or queued when SMTP is disabled).

### Weekly

1. Run Send Due Reminders batch for eligible overdue invoices.
2. Review unresolved invoice notes and confirm next follow-up actions.
3. Check for duplicate/incomplete customer profiles and clean up safely.

### Monthly

1. Verify documentation accuracy against current UI labels and workflows.
2. Review automation behavior and technical override documentation.
3. Add documentation updates to Documentation/CHANGELOG.md.

# 01 Getting Started

## Overview

This guide helps you understand what the system does and where to go first.

The platform has two main admin work areas: - Bookings for scheduling and customer lesson operations. - Invoices for billing, reminders, and payment tracking.

## Before You Start

- You need admin access to /admin/login.
- You should know your business process for:
  - approving lesson requests,
  - handling cancellations/moves,
  - sending invoices,
  - recording payments.

## Step-by-Step Instructions

1. Open /admin/login.
2. Sign in with your admin email and password.
3. After login, you will land on the Bookings console.
4. In Bookings, use the main action buttons:
  - Add Manual Booking
  - Customers
  - Invoices
5. Use Invoices to manage billing lifecycle actions:
  - create/send invoices,
  - mark paid,
  - send reminders,
  - create credit notes when needed.

## Expected Result

- You can move between admin areas confidently.
- You understand which section handles booking operations vs billing operations.

## Common Mistakes

- Doing billing updates in `Bookings` when the invoice already exists in `Invoices`.
- Using ad-hoc notes instead of status actions (`Send`, `Mark paid`, `Create credit note`).

## Troubleshooting

- If login fails, see `02-Admin-Login-and-Access.md`.
- If you cannot find a customer, see `04-Customer-Directory.md`.
- If you cannot find an invoice, see `05-Invoice-Management.md`.

## Related Guides

- [02-Admin-Login-and-Access.md](#)

- [05-Invoice-Management.md](#)

# 02 Admin Login and Access

## Overview

This guide explains how to sign in, sign out, and handle common access issues.

## Before You Start

- You need:
  - admin email,
  - admin password.
- If you do not have credentials, contact the owner/system administrator.

## Step-by-Step Instructions

1. Go to `/admin/login`.

2. Enter your details:

- Admin email
- Password

3. Click Sign in.

4. If successful, you will be redirected to /admin/bookings.

5. To sign out:

- in Bookings OR Invoices, click Sign out.

## Visual Reference

The screenshot shows the 'Owner Booking Console Login' page for Melbourne Guitar School. At the top, there is a header with the school's name and a blue circular logo. Below the header is a dark blue navigation bar with a button labeled 'ADMIN ACCESS'. The main content area has a dark blue background with the title 'Owner Booking Console Login' and a subtitle explaining the login purpose. There are two input fields for 'Admin email' and 'Password'. A blue 'SIGN IN' button is located below the password field. At the bottom of the page, there is a large image of a microphone and two footer links: 'Owner sign-in' and 'Melbourne Guitar School 2026'.

### Owner Booking Console Login

Sign in to approve pending bookings, manage recurring schedules, and review day/week/month calendar views.

Admin email

Password

**SIGN IN**

Owner sign-in

Melbourne Guitar School 2026

Admin login page

## Expected Result

- You can access admin tools after sign-in.
- You are redirected to booking operations by default.

## Common Mistakes

- Typing spaces before/after email.
- Using old password after a credential update.
- Staying on a stale tab/session and assuming current state is live.

## Troubleshooting

- Error: Login failed. Check your email and password.
  - Re-enter credentials carefully.
  - Confirm correct email account.
- Redirected back to login unexpectedly:
  - Your session may have expired.
  - Sign in again and continue.

## Security Notes

- Do not share admin credentials over unsecured channels.
- Sign out on shared devices.
- If credentials are exposed, rotate them immediately.

# 03 Booking Management

## Overview

Use the booking console to review lesson requests, manage confirmed bookings, and keep schedules accurate.

## Before You Start

- Sign in at `/admin/login`.
- Open `/admin/bookings`.

- Understand status colors in the legend:
  - Confirmed
  - Pending
  - Rejected (48h)
  - Cancelled (48h)

## Step-by-Step Instructions

### A) Review Calendar and Pick a View

1. Use the view selector to switch Day, Week, Or Month.
2. Set Base date if you need a specific day or week.
3. Click a booking or request to open the detail dialog.

### B) Approve or Reject Pending Requests

1. Click a pending request.
2. Review customer details and requested lesson details.
3. Click:
  - Approve request to convert to confirmed booking, or
  - Reject request to decline.

### C) Edit, Move, or Cancel Confirmed Bookings

1. Click a confirmed booking.
2. Update details as needed (contact details, lesson details, time).
3. Click Save details for profile/booking edits.
4. Click Move booking if start time/date changed.
5. Click Cancel booking if lesson is cancelled.

### D) Send Booking Communications

1. Open a booking.
2. Use:
  - Send reminder for reminder message.
  - Email customer for a custom message.

### E) Remove Future Recurring Series

1. Open a booking that belongs to a recurring series.
2. Click Remove series.
3. Confirm the action.

## **F) Create Invoice from Booking**

1. Open a confirmed booking.
2. Click `Create invoice`.
3. Enter:
  - lesson fee,
  - due date,
  - optional extras (books/digital/custom),
  - tax mode,
  - notes.
4. Click `Create invoice`.
5. Continue invoice processing in `/admin/invoices`.

[SAVE DETAILS](#)[MOVE BOOKING](#)[CREATE INVOICE](#)[SEND REMINDER](#)

The screenshot displays the 'Owner Booking Console' interface. At the top, there's a 'SIGN OUT' button. Below it, a 'WEEK VIEW' section shows a calendar for the week of 19/02/2026. The calendar indicates 'No events' for Monday (16) and Tuesday (17). A modal window titled 'Create invoice' is open for a customer named 'Dean Thomson'. The modal includes fields for 'Lesson fee (AUD) \*' (e.g. 80), 'Due date \*' (06/03/2026, 07:58), and checkboxes for 'Educational books' and 'Digital guitar lessons'. There are also fields for 'Custom charge' with a 'Custom description' and 'Custom amount (AUD)'. At the bottom of the modal, there are buttons for 'SAVE DETAILS', 'MOVE BOOKING', 'CREATE INVOICE', and 'SEND REMINDER'. The background of the console shows buttons for 'CONFIRMED', 'PENDING', 'REJECTED (48H)', 'CANCELLED (48H)', 'ADD MANUAL BOOKING', 'CUSTOMERS', and 'INVOICES'.

## Expected Result

- Bookings reflect real schedule status.
- Customers receive timely communications.
- Billing can start directly from completed lesson operations.

## Common Mistakes

- Editing booking fields but forgetting Save details.
- Moving a booking but skipping reminder communication.

- Cancelling single booking when you meant to remove the full recurring series.

## Troubleshooting

- Booking not visible:
  - Check date range/view.
  - Confirm status filter context in legend.
- Cannot process pending request:
  - Re-open request and verify required fields are valid.
- Invoice button not visible:
  - Confirm the item is a confirmed booking, not pending request.

# 04 Customer Directory

## Overview

The customer directory is used to store reusable customer profiles for faster booking and billing operations.

## Before You Start

- Open `/admin/bookings`.
- Click `Customers` in the action row.

## Step-by-Step Instructions

### A) Search Existing Customers

1. Open `Customers`.
2. Use the `Search` field.

3. Review matching customer rows.

## **B) Create a New Customer**

1. Click `Create New Customer`.
2. Complete the form fields.
3. Click `Save customer`.

## **C) Edit Customer Details**

1. Find the customer in the list.
2. Click `Edit`.
3. Update relevant details.
4. Click `Save customer`.

## **D) Delete/Archive Customer**

1. Find the customer row.
2. Click `Delete`.
3. Confirm action.

Important: - Deleting/archiving is designed to preserve history links where possible. - Use this only for invalid or duplicate profiles that should no longer be active.

## **E) Open Customer Invoice History**

1. In the customer row, click `Invoices`.
2. You will be redirected to invoice console filtered by customer.

## Expected Result

- You maintain clean customer records.
- Manual booking and invoicing become faster due to reusable customer details.

## Common Mistakes

- Creating duplicate profiles when a profile already exists under slight naming differences.

- Deleting active customers instead of correcting details.

## Troubleshooting

- Customer not found in search:
  - Try email or phone fragments.
  - Check for typo variants in name spelling.
- Duplicate profiles discovered:
  - Keep the most complete profile.
  - Archive/delete incorrect duplicate after verifying history linkage.

# 05 Invoice Management

## Overview

Use the invoice console to create, edit, send, follow up, and close invoices.

This guide also explains when to use a credit note instead of delete.

## Before You Start

- Open `/admin/invoices`.
- Make sure customer details are accurate.
- Confirm business invoice defaults are configured (ABN, bank details, GST settings).

# Step-by-Step Instructions

## A) Create an Invoice from Invoice Console

1. Click `Create Invoice`.
2. Enter customer details (if not already customer-filtered).
3. Enter `Lesson fee`.
4. Add optional items:
  - Educational books
  - Digital guitar lessons
  - Custom charge
5. Set `Due at` and `Tax mode`.
6. Click `Create invoice`.

## B) Create Invoice from Booking

1. Go to `/admin/bookings`.
2. Open a confirmed booking.
3. Click `Create invoice`.
4. Fill in lesson pricing and optional extras.
5. Click `Create invoice`.

## C) Search and Filter Invoices

1. Use `Search` for invoice number, customer, or email.
2. Use `Status filter` (Draft, Sent, Paid, Void).
3. Use `Aging filter` (Current, Overdue 1-30, Overdue 31+).
4. Use `Outstanding only` for unpaid open invoices.

## D) Edit Invoice Details and Line Items

1. Click `view` on an invoice row.
2. Update `Due At`, `Notes`, and line items.
3. For line items:
  - edit description/qty/price/tax mode,
  - Add line item for additional charges,
  - Remove for incorrect entries.
4. Click `Save`.

## E) Send Invoice and PDF

1. Open invoice details.

2. Click `Send` to email customer with PDF attachment.
3. Click `Download PDF` to save/print local copy.

## **F) Payment and Lifecycle Actions**

1. Mark `paid` when payment is confirmed.
2. Mark `unpaid` if a payment was recorded incorrectly.
3. Void for invoice cancellation where applicable.

## **G) Send Overdue Reminders**

1. For one invoice, open it and click `Send reminder`.
2. For batch run, use `Send Due Reminders` from invoice toolbar.

## **H) Create Credit Note (for Sent/Paid Invoices)**

1. Open a sent or paid invoice.
2. Click `Create credit note`.
3. Enter reason (optional but recommended).
4. Confirm creation.

Use credit note when: - issued invoice amount was wrong, - charge should be reversed, - you need an audit-safe correction.

Do not delete sent/paid invoices. Use credit note instead.

## GST Guidance (Operational)

- Use configured tax mode according to your business setup.
- If unsure about GST treatment, use your accountant-approved policy.
- This guide is operational only and not tax advice.

## Expected Result

- Invoices are accurate, traceable, and customer-ready.
- Payment status and outstanding balances stay reliable.
- Corrections are handled safely with credit notes.

## Common Mistakes

- Sending invoice before checking due date and line items.

- Deleting draft by mistake instead of voiding/editing.
- Using delete when credit note is required for sent/paid invoices.

## Troubleshooting

- Invoice not visible:
  - clear filters and click Refresh.
- Reminder button disabled:
  - invoice may not be overdue or not in Sent status.
- Create credit note unavailable:
  - invoice must be Sent Or Paid.

# 06 Email and Notifications

## Overview

This guide explains customer and owner emails, what is automatic vs manual, and how to verify delivery state.

## Before You Start

- Ensure you are signed in as admin.
- Understand whether SMTP is configured in your environment.

# Step-by-Step Instructions

## A) Manual Booking Communication

From booking dialog in `/admin/bookings`: 1. Click `Send reminder` for standard reminder email. 2. Click `Email customer` for custom message email.

## B) Invoice Communication

From invoice detail in `/admin/invoices`: 1. Click `Send to dispatch invoice` email with PDF attachment. 2. Click `Send reminder` for overdue reminder email.

## C) Automated Email Workflows

Current automation includes: - Daily bookings digest job. - Scheduled invoice reminder job.

These run through secured job endpoints and cron schedule.

## D) Verify Email Outcomes

If SMTP is configured: - Emails should be sent immediately.

If SMTP is not configured: - Emails are recorded as `queued_no_smtp` for audit tracking.

Operationally, this means communication actions still log intent even when external delivery is unavailable.

## Expected Result

- Admin can send and track key customer communications.
- Team knows difference between sent vs queued fallback behavior.

## Common Mistakes

- Assuming queued fallback means customer received email.
- Sending reminder before checking invoice state and due status.

# Troubleshooting

- No email delivered to customer:
  - Check whether SMTP is configured.
  - Confirm action was triggered from correct screen.
- Reminder email unavailable:
  - confirm invoice is overdue and in sent status.

## Technical User Appendix (Owner/Technical Ops)

### Scheduled Job Endpoints

- POST /api/jobs/daily-bookings-digest
- POST /api/jobs/invoice-reminders

Required header for both: - x-cron-secret: <CRON\_SECRET>

### Invoice Reminder Job Optional Payload

```
{  
  "dryRun": true,  
  "maxInvoices": 100,  
  "stage": 14,  
  "customerId": "<optional-customer-id>"  
}
```

Fields: - dryRun: preview only, no sends. - maxInvoices: cap batch size. - stage: force stage filter (7, 14, 30). - customerId: target one customer.

Use technical overrides for diagnostics or controlled runs, not routine daily operation.

# 07 Reports, Outstanding, and Follow-Up

## Overview

This guide explains how to manage outstanding invoices and run a consistent follow-up routine.

## Before You Start

- Open `/admin/invoices`.
- Ensure invoice statuses are up to date.

## Step-by-Step Instructions

### A) Review Outstanding Invoices

1. Enable `Outstanding only`.
2. Set `Aging filter` as needed:
  - `Current`
  - `Overdue 1-30`
  - `Overdue 31+`
3. Sort your work list by due date urgency.

### B) Follow-Up Routine (Recommended)

1. Daily:
  - check overdue invoices,
  - send single reminders where needed.
2. Weekly:
  - run `Send Due Reminders batch`,
  - review invoices still unpaid after reminders,
  - escalate manually for high-priority accounts.
3. End of week:
  - check paid/unpaid status accuracy,
  - issue credit notes where correction is needed,
  - update notes for unresolved cases.

## C) Use Reminder Stages

Reminder stages are designed around overdue thresholds: - 7 days - 14 days - 30 days

Use these as your standard communication cadence.

## D) Track Outcomes

For each reminder cycle: - verify reminder actions completed, - verify paid updates are reflected, - verify unresolved invoices carry clear notes.

## Visual Reference

The screenshot displays the 'Invoice Console' interface. At the top right, there are buttons for 'BOOKINGS' and 'SIGN OUT'. Below the header, there are search and filter controls. The 'Search' field is labeled 'Invoice #, customer, email'. The 'Status' dropdown is set to 'All'. The 'Aging' dropdown is also set to 'All'. There is a checkbox for 'Outstanding only' which is checked. Below these filters are buttons for 'REFRESH', 'SEND DUE REMINDERS', and a prominent blue 'CREATE INVOICE' button. A note about GST guidance is present. The main section shows a list of invoices, with the first one highlighted: 'MGS-2026-0002 - Dean Thomson'. This invoice has a status of 'draft', a total of '\$95.00', is 'Current' in aging, and is due on '06/03/2026'. There are 'VIEW' and 'DOWNLOAD PDF' buttons for this invoice. A second invoice, 'MGS-2026-0001 - Dean Thomson', is partially visible below it.

Invoice filters with outstanding toggle

## Expected Result

- Outstanding balances are actively managed.
- Follow-up is consistent, auditable, and easy to hand over.

## Common Mistakes

- Sending repeated reminders without checking stage progression.
- Forgetting to update status after payment confirmation.
- Mixing billing corrections into delete actions instead of credit note flow.

## Troubleshooting

- Outstanding list looks wrong:
  - check whether invoice was marked Paid or Void.
  - clear filters and reload.
- Batch reminders sent fewer than expected:
  - only eligible overdue sent invoices are included.

## Technical Operations (Owner/Technical User)

### Cron Schedule Reference

Configured in `vercel.json`: - Daily bookings digest. - Daily invoice reminders.

### Controlled Reminder Runs

Technical users can run reminder job with payload overrides using: - `dryRun` for preview, - `stage` for specific threshold runs, - `maxInvoices` for throttling, - `customerId` for targeted troubleshooting.

Always record why overrides were used and the results.

# 08 Troubleshooting and FAQs

## Overview

Use this guide to quickly resolve common booking, customer, and invoice issues.

## Before You Start

- Confirm you are in the correct admin area:
  - /admin/bookings
  - /admin/invoices
- Reproduce the issue once to confirm current behavior.

## Common Issues and Fixes

### 1) Cannot Log In

- Check email/password spelling.
- Retry in a fresh browser tab.
- Confirm credentials with owner.

### 2) Booking Changes Not Reflected

- After edits, ensure `Save details` was clicked.
- If time changed, use `Move booking`.
- Refresh view and confirm correct date range.

### 3) Customer Not Found

- Search by email or phone fragment.
- Check if duplicate/alternate spelling exists.
- Recreate customer profile only if no existing profile is present.

### 4) Invoice Not Appearing in List

- Clear search filter.
- Clear status/aging filters.
- Toggle `Outstanding only` off and refresh.

## 5) Reminder Button Disabled

- Invoice must be Sent.
- Invoice must be overdue.

## 6) Cannot Delete Invoice

- Sent/paid invoices are protected.
- Use `Create credit note` for correction.

## 7) Customer Says They Did Not Receive Email

- Confirm action was triggered.
- If SMTP is disabled, action may be queued (`queued_no_smtp`) but not externally delivered.

## 8) PDF Download Issues

- Retry from invoice detail and from list action.
- Check browser pop-up/download blocking settings.

# FAQ

## Should I delete an incorrect sent invoice?

No. Use `Create credit note` so history remains correct and auditable.

## What if payment was marked by mistake?

Use `Mark unpaid` and add notes.

## Can I send reminders in bulk?

Yes, use `Send Due Reminders` in invoice console.

## Can I customize reminder cadence?

Operationally use 7/14/30-day flow. Technical overrides are available for owner/technical users.

# Escalation Checklist

Escalate to owner/technical support when: - repeated login failures continue, - invoice lifecycle actions are unavailable unexpectedly, - scheduled reminder jobs fail repeatedly, - communication delivery is business-critical and SMTP is unavailable.

# 09 Glossary

## Overview

This glossary defines key terms used in the admin system and in this documentation set.

## Before You Start

- Use this guide when a term in another guide is unclear.
- Check UI labels in the product when in doubt.

## Step-by-Step Instructions

1. Use Ctrl/Cmd + F to search this page for a term.
2. If a term is not listed, check related guides first:
  - [03-Booking-Management.md](#)
  - [05-Invoice-Management.md](#)
  - [07-Reports-Outstanding-and-Follow-Up.md](#)
3. If still unclear, record the term for documentation update in [Documentation/CHANGELOG.md](#).

# Terms

- Admin: A signed-in operator with access to booking and invoice tools.
- Aging: Overdue grouping for invoices (Current, Overdue 1-30, Overdue 31+).
- BSB: Australian bank/branch code used with account number for transfers.
- Booking: A scheduled lesson record.
- Booking Request: A pending lesson submission awaiting admin approval or rejection.
- Confirmed Booking: A booking approved and active in the calendar.
- Cancelled (48h): Booking cancelled within 48 hours flag window.
- Rejected (48h): Booking request rejected within 48 hours flag window.
- Credit Note: Audit-safe reversal/correction record for sent or paid invoices.
- Cron Job: Scheduled server task that runs automatically.
- CRON\_SECRET: Shared secret header value used to authorize scheduled job endpoints.
- Customer: A stored learner profile used in bookings and invoices.
- Customer Directory: Admin list to search, create, edit, and maintain customer profiles.
- Digest Email: Daily summary email for bookings operations.
- Draft Invoice: Invoice that is created but not yet sent.
- Due At: Invoice due date field.
- GST: Goods and Services Tax; operational handling follows accountant-approved business policy.
- Invoice: Billing document for lessons/products/services.
- Invoice Number: Unique identifier for an invoice record.
- Line Item: Charge entry on invoice (description, quantity, price, tax mode).
- Mark Paid: Action that sets invoice payment status to paid.
- Mark Unpaid: Action to revert an invoice from paid to unpaid when correction is needed.
- Outstanding Only: Invoice filter that shows unpaid open invoices.
- PDF Invoice: Downloadable/printable invoice file.
- Queued No SMTP (queued\_no\_smtp): Logged email action when SMTP is not configured.
- Reminder Stage: Overdue threshold flow used for reminders (7, 14, 30 days).
- Send Due Reminders: Bulk action to send reminders for eligible overdue invoices.
- Sent Invoice: Invoice status after customer send action.

- SMTP: Mail delivery configuration used to send real emails externally.
- Tax Mode: Per-line or invoice-level tax setting used by billing workflow.
- Void Invoice: Cancellation status for an invoice where applicable.

## Expected Result

- Operators can quickly resolve unfamiliar terms without interrupting daily work.

## Common Mistakes

- Assuming glossary definitions replace accountant or legal advice.
- Treating `queued_no_smtp` as confirmed external delivery.

## Troubleshooting

- Term does not match UI wording:
  - Capture the exact UI label.
  - Update this glossary and related guides in same change set.
- New workflow introduces new terms:
  - Add definitions here before releasing updated workflow docs.
